

In today's digital economy businesses are relying more than ever on IT. While witnessing seismic shifts in how they buy and consume technology. With operational efficiency, agility, and 24/7 connectedness front of mind, cloud providers such as Amazon Web Services and SoftLayer, are making it easier for businesses to move into the cloud without ever having to engage IT. As IT simplicity and freedom becomes more necessary and available, so does the need to measure and optimize spending without impeding the speed of business. Introducing our cloud solutions and toolset designed to overcome the challenges of moving your business into the cloud. With our cloud team by your side, you can access a portfolio of integrated and packaged cloud offerings. Or, purchase cloud infrastructure leveraging our resold services programs while taking advantage of our global relationships in the cloud toolset. Our integrated and packaged cloud offerings provide pre-architected, ready to implement solutions with subscription pricing that helps speed time to market by reducing risk and complexity. Our resold services deliver extended features and benefits. And with the cloud toolset, you have access to a powerful tool that enhances the cloud providers native billing capabilities to reduce overall spending, better manage and govern accounts, track usage across the enterprise and streamline. Billing learn more by contacting us today. You'll be glad you did.
