Logan Schindhelm

Practice Manager

Logan is a Practice Manager at SVA Consulting.

With expertise in strategic planning, business process design and improvement, and accounting and finance, he partners with clients in the financial services and professional services sectors to streamline operations, optimize workflows, and align systems with organizational goals.

Logan leads ERP implementations from start to finish, gathering business requirements, configuring systems strategically, and conducting validation testing to ensure successful adoption. He also provides guidance to clients looking to refine process flows and strengthen system frameworks, driving efficiency and scalability across their organizations.

Known for his collaborative approach, Logan manages client relationships through regular check-ins and planning meetings, ensuring solutions remain aligned with evolving business needs. His focus is on delivering practical, results-driven strategies that help clients achieve measurable performance improvements.
