Sandy Wojtysiak

Manager of Solution Architecture

Sandy is the Manager of Solution Architecture at SVA Consulting, helping organizations solve complex business challenges by aligning technology with their operational goals.

She works with clients across the manufacturing, distribution, construction, and professional services industries to evaluate business needs, design technology strategies, and implement ERP solutions that improve efficiency, increase visibility, and support long-term growth.

Sandy specializes in solution architecture, business application design, and business process automation, with expertise in Acumatica ERP, ERP integrations, artificial intelligence, financial management, and data conversion. She partners closely with clients to understand their unique processes and identify opportunities to streamline workflows, automate manual tasks, and improve the flow of information across their organizations.

Working collaboratively with project teams, Sandy architects scalable, future-ready solutions that not only address current business challenges but also position organizations for continued growth. By combining her accounting, operations, and technology expertise, she helps clients maximize the value of their ERP investment and achieve measurable business results.
